NON RETURN DAMPER

APPLICATION

Non Return Dampers are designed for use in intake & discharge opening in Air Conditioning systems. When the ventilation system is ON, the blades of the Non-Return Damper are held in the open position by the airflow. If the system is switched OFF, the damper blades close automatically, thus preventing reverse airflow and giving protection against the ingress of untempered air, rain and birds into the air conditioning system.

PRODUCT MATERIAL

Galvanized material (also available in stainless steel SUS304, 316 material)

STANDARD SIZES

We provide square and round non return dampers
Size can be customized according to customer requirements.
